# panDOMO® WP

## Cleaning liquid

---

### Intended applications:

#### For inside use:

PANDOMO WP Cleaning liquid simultaneously cleans and protects all PANDOMO Floors treated with PANDOMO SL Stone oil and PANDOMO DMC Dispersion maintenance coat.

### Features:

- Non-slip
- Water-resistant
- Firm tread
- Does not form layers

PANDOMO WP Cleaning liquid has a dirt-repellent action that gives floors treated with it a silky gloss.

### Use:

#### Initial care:

Prior to opening the PANDOMO Floor to foot traffic, after applying the PANDOMO SL Stone oil an initial care has to be applied. The initial care can be done with PANDOMO WP Cleaning liquid or if a higher load and dirt resistance is required with PANDOMO DMC Dispersion maintenance coat.

#### First treatment with PANDOMO WP Cleaning liquid:

To enable floor to be used, it must initially be treated with 500ml PANDOMO WP Cleaning liquid mixed with 10 l water.

#### First treatment

**with PANDOMO DMC Dispersion maintenance coat:**  
Is described in the technical data sheet of PANDOMO DMC.

#### Maintenance cleaning of all PANDOMO Floors:

Use PANDOMO WP Cleaning liquid for regular maintenance cleaning as well. First remove dirt and sand using a broom or the brush side of a vacuum cleaner, since both of these act as abrasive paper. Then, depending on the extent to which the floor has been affected, add 50 ml PANDOMO WP Cleaning liquid (one cupful) to 10 l clean water and wipe the surface with a floor cloth which has been wrung out until it is moist to the touch, but not wet.

### Important:

Work with 2 buckets: one for the clean PANDOMO WP Cleaning liquid, the other to wring out the floor cloth.

Do not mix the product with other care and cleaning agents, as this may adversely affect the surface.

Do not walk on the floor or wipe over while the PANDOMO WP Cleaning liquid is still wet and shiny.

### General:

In principle, whenever the floor is cleaned, avoid »flooding« it. Always apply PANDOMO WP Cleaning liquid as a very fine mist!

The more care is taken over the freshly treated floor during the first days, the longer it will last!

Do not subject to full loads until after the oil has cured around 2–3 days (depending on climatic conditions).

### Technical data according to ARDEX quality standards:

---

**Density:** approx. 0.9 kg/l

**Consumption:** first treatment of floors treated with PANDOMO SL Stone oil:  
= 500 ml/10 l water  
maintenance cleaning of all PANDOMO Floors:  
= 50 ml/10 l water

**Packaging:** 5 l canister  
6 x 1 l per carton

**Storage:** can be stored for approx. 24 months in a dry environment away from frost in well sealed containers

Once open,  
seal container and use soon
