

CASE STUDY

EPCOS (A TDK Group Company)

Kolkata, India

ARDEX ENDURA PRODUCTS

- R 3 E
- R 21 CE
- R 24 CE

Challenge

This recommendation was Self Smoothing Epoxy Floor topping which needs to be completed when plant is functioning without shut down and adhering to safety policy of the company.

Problem/Situation

The Floor concrete earlier treated with a Epoxy Floor Topping and in very bad shape. The surface preparation really a difficult task due to deterioration of floor with cracks, pot holes, widening of joints etc.,

Solution

R 3 E primer, R 24 CE and R21CE combination used as a unique solution for this project requirement. The complete plant was treated with Epoxy floor Topping

Unique Elements

The system recommendations were made by ARDEX ENDURA and the same is well demonstrated to the client during the initial discussion. Our global reputation and confident of ARDEX ENDURA team helped to close the sale with the client t. Later the floor topping work was executed by our authorized applicator M/s Castro Engineers. The application work carried out with utmost care with constant inputs from our CSTD and Sales PS team.
